Indiana University
Office of Facilities

To whom it may concern:

Please allow this letter to serve as my personal recommendation of 3D Professional Contractors for any upcoming construction projects that you may have at the Bloomington campus. 3D Pro has exceptionally performed two phases of renovation of a building for Ivy Tech in Franklin Indiana during the summers of 2008 and 2009. Each phase of the project included construction of pristine classroom/lab space and offices within an existing pre-engineered building located at 2205 McClain drive. The scope of work for each phase was comprised of a variety of disciplines including electrical, mechanical, glazing, HVAC, and general construction. I invite you to visit our campus to see first-hand the level of quality workmanship produced by Ernie Kempf (Job Superintendent) and his skilled workforce. Working with Don Hawkins on project management/planning and Ernie Kempf on daily operations and scheduling has been a very positive experience for us at Ivy Tech. We have found both of these gentlemen to be top notch performers and have exemplified a high level of professionalism and customer service throughout the projects.

I would be happy to discuss further any questions you might have regarding our projects and the services of 3D Professional Contractors. Feel free to call me at your convenience at the number listed below.

Sincerely,

A handwritten signature in black ink, appearing to read "Dave Donnell".
